- Web components development

Education and Certs

Responsive Web Design,
JavaScript Algorithms and
Data Structures, Front End
Libraries, and APIs and
Microservices

FREE CODE CAMP | January 2020

Resourceful professional with successful track record in developing innovative web apps and features. Possesses solid knowledge of HTML, CSS, JavaScript and Bootstrap with ability to quickly learn new technologies. Demonstrated success in identifying and resolving complex code issues.

Personal Information

Title: Front End Web Developer

Work history

Front-End Web Developer

Disaster Accountability Project, Remote | January 2021 - Current

- Provided front-end website development using GitHub, VS Code, and other editing software.
- Coded websites using HTML, React Components, Styled Components, Bootstrap classes, and TypeScript.
- Planned website development, converting mockups into usable web presence with HTML, and JavaScript.
- Completed comprehensive redesigns of legacy websites originally built with Angular 1.0, transitioning them to React 2.0 to improve navigation, enhance visual appeal, and boost search engine rankings.
- Collaborated with in-house web designers to create sleek and innovative UI design.
- Conducted unit testing to deliver optimal browser functionality using Cypress.

Mobile Expert

T-Mobile, Westminster, USA | January 2020 - Current

- Selling Devices with plans including Home Internet, troubleshooting, Customer Service, and technical support including legacy Sprint customers.

Projects

Clips, Angular, Webpack, Web Assembly, Tailwind, Firebase, I created an app for the user to register and login with Firebase to interact and authenticate users to upload clips and share it with others.
