Summary

Hi I am Andrew, looking for full time OR Part Time entry level position as a Front-End Developer OR Full Stack Developer. I can create and maintain a proficient static and dynamic website focused on Security, Loading Page Speed, Cross-Browser Support, and Responsive Design. I am a self-directed, lifelong learner, who is hard working and a problem solver. I have a passion for web programming and can work independently as well as within a team, providing excellent and high-quality work.

Awards

6 years experienced in sales

Top Salesman in the region

Skills

HTML5/

CSS3

— Creating static websites using HTML5 elements with CSS3 properties and combining them together to create a good looking pages.

Bootstrap

— Combining HTML, CSS, and Bootstrap to create responsive pages with bootstrap icons for more productivity in less time.

JavaScript

— Working with JavaScript logic to create a dynamic and static web pages for the Front-End side, In addition to that, using libraries such as p5.js, anime.js, swiper.js, and others to create a professional Design. As well as, the use of JavaScript for Back-End service for Node JS. Eventually, fixing bugs in the code as needed for the website to work and maintain properly.

Node JS

— Working with Node JS, Express, and some Back End npm's such as Multer and Socket io to fully interact with Front End View and Back End Server.

MongoDB

— Providing CRUD operations between the Back End Node JS server and MongoDB database server, and working with Mongoose if needed after creating a template Schema before saving to the database.

React

— Working with MERN Stack components providing an end-to-end framework. Create and maintain web apps using React-Router and some React npm's to work with Back-End to fetch API data from MongoDB database, as well as creating UI design for Front-End.

Angular

— Building web applications with Angular and using Node JS as a web server to fetch JSON data from GitHub Api to search for users and deploying it with Heroku CLI.

UI / UX

— Building Website templates and web API with user friendly Design, easy to access and maintain, clean code, well commented, and attractive looking website.

Web
Design
RESTful
API

— Experience working with Adobe Photoshop, Illustrator, and XD to create a logos, and photos for the Web.
